

Heartland Polymers Welcomes Experienced Industry Leader to Team*We believe in better*

CALGARY, AB, January 19, 2026: Heartland Polymers today announces Joanne Swiggett has joined its leadership team as Vice President, Petrochemical Commercial. Ms. Swiggett brings more than 30 years of experience in the petrochemical and polymers industry to the role, most recently serving as Vice President, Commercial Strategy Global Feedstocks & Energy at LyondellBasell.

Ms. Swiggett's portfolio as Vice President of Petrochemical Commercial includes overseeing Heartland Polymers' polypropylene sales and marketing, customer service, logistics and feedstock supply, and integrated business planning.

"What Heartland Polymers is doing is truly unique," says Ms. Swiggett. "As the only single-site, integrated PDH/PP producer in North America, Heartland is set up to deliver world-class reliability to customers. The integrated facility supports the team's agility to collaborate with customers and meet their respective needs, making Heartland's service model a differentiating asset. The facility's climate-secure location far from the Gulf Coast further positions Heartland to deliver on-time, high-quality polypropylene to customers when and where they need it."

Heartland Polymers' CEO, Todd Karran, adds, "The timing of this appointment, combined with Ms. Swiggett's valuable expertise and proven leadership, will continue to strengthen Heartland Polymers' commitment to delivering exceptional value and offering customers a distinctive and reliable alternative in the marketplace."

Ms. Swiggett brings extensive experience from her career in the industry to Heartland, including prior roles in specialty polymers, polypropylene sales, compounding, and upstream products managing natural gas supply and distillate trading. Those roles and experiences have included a geographic focus on North America, Asia Pacific and globally. Prior to her more than 10 years at LyondellBasell, Ms. Swiggett also held roles at Equistar Chemicals. She holds a Master of Business Administration and a Bachelor of Science degree in Chemical Engineering.

About Heartland Polymers

Heartland Polymers is bringing fresh energy and new ideas to the global polymer industry as North America's first single-site, integrated propane dehydrogenation and polypropylene producer. With a nameplate capacity of 525KTA, we're focused on shaping a superior customer experience from order to optimization built on a foundation of quality and reliability. Heartland Polymers polypropylene is made in Canada, but can be where customers need it, when they need it via our vast rail network and storage-in-transit capabilities. Heartland Polymers is a business unit of Inter Pipeline with offices in Short Hills, New Jersey, and Calgary, Alberta. People. Polymers. Performance. Planet. We believe in better. www.heartlandpolymers.com
